DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Watson on April 13, 2006.

Replace in claim 1 "an interface coupled to the first IC" with " a single link-interface coupled to the first IC".

Replace in claim 11, "transmitting the state of each of the plurality of signals in band across an interface to a second IC" with "transmitting the state of each of the plurality of signals in band across a single link interface to a second IC".

Replace in claim 15, " a chipset; an interface coupled to the chipset" with "a chipset; a single link-interface coupled to the chipset".

Allowable Subject Matter

2. Claims 1 – 24 are allowed.

3. The following is an examiner's statement of reasons for allowance: Independent claim 1 is allowable over the prior art of record because the examiner found neither prior art cited in its entirety, nor based on the prior art found any motivation to combine any of

Art Unit: 2111

said prior art. The following limitations were not found in the prior art of record: a single link-interface coupled to the first IC; and a second IC coupled to the interface, wherein the first IC simultaneously transmits the state of each of a plurality of signals not associated with the interface to the second IC in band via the interface each time that a change in the state of one of the plurality of signals is detected.

Independent claim 11 is allowable over the prior art of record because the examiner found neither prior art cited in its entirety, nor based on the prior art found any motivation to combine any of said prior art. The following limitations were not found in the prior art of record: monitoring the state of each of the plurality of signals in band across a single link interface to a second IC each time that a change in the state of one of the plurality of signals is detected.

Independent claim 15 is allowable over the prior art of record because the examiner found neither prior art cited in its entirety, nor based on the prior art found any motivation to combine any of said prior art. The following limitations were not found in the prior art of record: a single link-interface coupled to the chipset; and an integrated circuit (IC) coupled to the chipset, wherein the chipset simultaneously transmit the state of each of a plurality of signals not associated with the interface to the IC in band via the interface each time that a change in the state of one of the plurality of signals is detected.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
